### BONE second Plenary Meeting

The second BONE Plenary meeting took place in Poznan International Fair on the 6th of October 2009, hosted by Poznan University. WP meetings were also held on October 5<sup>th</sup> together with a Roadmap Workshop and Management Meeting. The picture below was taken during the 2 day event.

### BONE stand at ECOC09 exhibition

For another year BONE successfully held a booth at ECOC 09 exhibition. This year the booth was next to the NoE EUROFOS booth hence the BONE booth was highly attended. Also there was a number of ICT problems presented at the booth like for example posters from HECTO, ALFA and POF PLUS projects while the two latter exhibited small demonstrations. Furthermore a Gender Issues corner was used to raise awareness on the specific issue. In the specific corner there were Gender Panel questionnaires distributed to ladies, optical networks professionals coming from outside the consortium. Also a video on the Schools event featuring 120 School girls taking place in UEssex last July was presented there together with a BONE poster from the event.

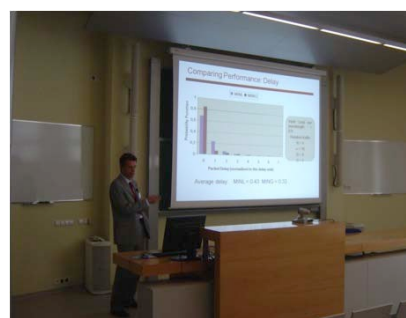

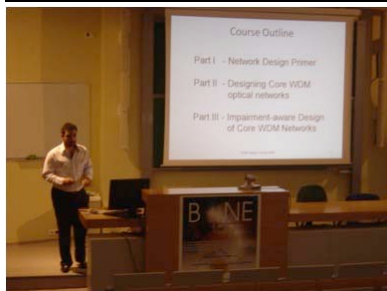

### BONE Summer School 2009 and Master School 2009

The BONE Summer School 2009 and Master School 2009, hosted by the AGH-UST, took place in the last days of September in Krakow. Specifically, the Summer School takes place 28th - 29th September and the Master School 30th September - 2nd October. The topics were:

- *Advances in Core Networks for the Summer School*
- *Optical Core Networks - Selected Areas for the Master School*

In addition to the lectures prepared by the invited speakers, the students were also offered a possibility to share the results of their research. The events were highly attended by different partners, 64 people coming from 17 partners from 9 different countries were involved in the events. The following photos were taken during the event.

## Upcoming events

### Future Network and Mobile Summit 2010

Future Network and Mobile Summit 2010 takes place in the Historical City of Florence, 16 - 18 June 2010. This is the nineteenth in a series of Annual Conferences supported by the European Commission, which regularly attracts over 600 delegates from industry and research to share experiences and research results, identify future trends, discuss business opportunities and identify opportunities for international research collaboration under the ICT Theme of Framework Programme 7 (FP7). It will thus contribute to showcasing European research in the field, and position it within the multiplicity of related initiatives supported in other regions of the world.

In the context of convergence, the 19th Future Network and Mobile Summit will address the challenges of building the Future Internet, based on mobile, wireless and fixed broadband communications infrastructures.

### 14th Conference on Optical Network Design and Modeling

The 14th International Conference on Optical Networking Design and Modeling - ONDM 2010 - will be held in Kyoto, Japan, on February 1-3, 2010.

As it is established practice at ONDM, the 14th installment will focus on cutting-edge, state-of-the-art research in optical networking and newly emerging areas. ONDM will also encourage submissions of the research papers that relate the topics of optical networking to the other areas and

disciplines, such as integration of optical and wireless networks or the role of optical network for the future Internet design. Controversial ideas and approaches and their open discussion are strongly encouraged. Moreover, ONDM in Japan will contribute to the community strengthening by inciting interactivity among the senior and junior participants as well as among the industrial and academic participants, in internationally.

### 2010 International Conference on High Performance Switching and Routing (HPSR 2010)

The 2010 International Conference on High Performance Switching and Routing (HPSR 2010) is the 11th in a series of annual conferences. Over the last 10 years, HPSR has evolved into an important forum of telecommunications and networking for the exchange of state-of-the-art knowledge and experience among researchers, engineers and practitioners from around the world. HPSR 2010 will be held at The University of Texas at Dallas, near the "Telecom Corridor" constituted by Alcatel-Lucent, Cisco Systems, Ericsson, Huawei, Nortel Networks, Nokia, Tektronix, and several other major industry leaders. The focus of HPSR 2010 is the innovative technology of high-speed, high-capacity and high-quality data transmission and switching for wired and wireless networks. HPSR 2010 will comprise of technical sessions for presentations of novel results, panel sessions for discussion of hot topics, and tutorials presented by leading experts.
